

Krown MR-35 Salt Eliminator

This test was performed independently by the City of Ottawa roads department. The pictures shown here are before and after pictures of a salt spreader cleaned using Krown's MR-35 Salt Eliminator.

The purpose of MR-35 is to not just wash the truck but to change the chemical composition of the salt so that it no longer sticks to the metals of a vehicle. Judge for yourself if it works.

THE JOB JUST GOT EASIER.

Please note the white areas - which are hardened salt - stuck to the wiring, frame, and painted surfaces of the truck.

THE JOB JUST GOT EASIER.

Following are six pictures of the underside of the truck. Notice the incredible build up of salt and how thick it has become over the course of the winter.

- Corrosion on weather packs and wiring is commonly related to calcium and magnesium chlorides sticking to the wiring as seen here.

THE JOB JUST GOT EASIER.

- Here again we see electrical connections literally covered with corrosive road salts.
- Note how thick the salt buildup is on this underside.

THE JOB JUST GOT EASIER.

- We can see here how the salt has actually built up to over an inch thick on top of the air tank and on the hose.
- Salt builds up everywhere under the truck.

THE JOB JUST GOT EASIER.

- Because of the highly-reactive nature of the calcium, magnesium and sodium chlorides, it is easy to see how corrosion becomes such a huge problem for fleets.
- Over \$25 billion dollars in damage is attributed to corrosion annually in Canada and the U.S.
- If there was a product that could successfully remove the chlorides from your fleet, wouldn't you want to know about it?

THE JOB JUST GOT EASIER.

Here are the after pictures of the same truck using Krown's MR-35 Salt Eliminator.

KROWN

THE JOB JUST GOT EASIER.

- A picture is worth a thousand words. MR-35 could well be worth thousands of dollars to your fleet.
- By effectively removing corrosive chemicals from your fleet you will reduce your corrosion related failures.
- Using MR-35 in a maintenance package with Krown's corrosion inhibitor will make the process the most comprehensive corrosion control program in the heavy duty market.
- This product will save you time, work, and money. Talk to your local distributor about MR-35 Salt Eliminator today.
